# Auto-PCOS Classification Challenge

**Team name**:

**Team member names and affiliation**:

| Members | Member Name | Affiliation |
|---|---|---|
| Member 1 | | |
| Member 2 | | |
| Member 3 | | |
| Member 4 | | |

**Contact number:**

**Email address**:

**Brief write up about the pipeline**:

**Figure of the developed pipeline**:

**Achieved results on validation dataset including**:

- A table of the achieved evaluation metrics on validation dataset for automatic classification of healthy and un-healthy frames in ultrasound imaging:

- Pictures (resolution 600 DPI) of any 5 best frames selected from validation dataset showing its classification:

- Pictures (resolution 600 DPI) of achieved interpretability plots of any 5 best frames selected from validation dataset:

**Achieved results on testing dataset including**:

- Pictures (resolution 600 DPI) of any 5 best frames selected from testing dataset showing its classification:

- Pictures (resolution 600 DPI) of achieved interpretability plot of any 5 best frames selected from testing dataset:
